MAKING STANDARD EXTRA SPECIAL

Central motion

cm:series

cm:series is a storage solution designed for environments where security, organisation and time effectiveness are paramount.

Based on a centrally rotating core cm:series provides increased filing access from a single standing point whilst providing security from its open/close locking functionality.

Security and live filing are both options with the cm:series. Using the units locking systems files can be stored within the unit in a permanently open/locked position; ensuring confidential documents are securely stored at the back* of the unit whilst live files are accessible from the front face. The unit can also be unlocked and rotated to closed at the end of the day, leaving the office looking tidy and files secured away.

cm:series accessories include slotted shelves, roll out reference shelves, shelf dividers, roll out filing frames, media drawers, security drawers, letter sorters, fixed lateral filing frames and duplex shelves.

| | Starter (mm) Height x Width x Depth** | Extension (mm) Height x Width x Depth** |
|---------------|--|--|
| 3 Tier | 1030 x 1149 x 787 | 1030 x 968 x 787 |
| 4 Tier | 1296 x 1149 x 787 | 1296 x 968 x 787 |
| 5 Tier | 1562 x 1149 x 787 | 1562 x 968 x 787 |
| 6 Tier | 1828 x 1149 x 787 | 1828 x 968 x 787 |
| 7 Tier | 2094 x 1149 x 787 | 2094 x 968 x 787 |
| 8 Tier | 2360 x 1149 x 787 | 2360 x 968 x 787 |

Please refer to the Specification Guide for full technical details.

* when placed against a wall

** allow an additional 180mm at rear of unit for rotation

Side motion

sm:series

sm:series– a simple solution for everyday office storage. By using both static and sliding storage units, mounted upon a track system base, sm:series guarantees an increased amount of filing capacity on a reduced footprint ratio.

NOTE: this image shows A4 Lever Arch

Using standard filing units such as open fronted bookcases and side tambours sm:series suites in with your existing storage. The system can also be retrofitted for existing storage, meaning no added expense of new units.

sm:series, similar to standard storage can be used as an office partition system as well as making the most of your under-utilised corridor and alcove spaces.

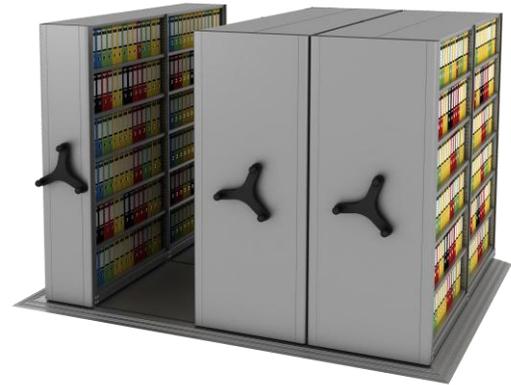

- The system is created by installing a row of static units fronted by one fewer sliding units. The units at the back are accessed by sliding the front storage.
- Storage Bank lengths can be easily increased by adding new track systems for new storage or existing.
- sm:series is easy to install. The track & floor system is fully leveled and it can be placed on top of existing floors, which means little disruption during installation and the ability to relocate the system at any time.
- sm:series can be integrated with Silverline Kontrax, m:line and s:line ranges.

Track motion

tm:series

tm:series has been designed specially to compliment front office environments, providing a high density yet compact and aesthetically pleasing system. This quality, secure rolling storage system is ideal for the working environment, providing a vast amount of storage space, with easy access.

NOTE: this image shows A4 Lever Arch

The tm:series is a modular design, allowing easy alteration, relocation or storage when not in use. The system has been designed to be housed in virtually any location, providing a highly versatile product.

tm:series can store all file types, utilising open fronted units, shelving, side tambours and cupboards.

- **Modular Component Design:** tm:series is easy to install. The track & floor system is fully leveled and it can be placed on top of existing floors, which means little disruption during installation and the ability to relocate the system at any time. The tm:series can be dismantled, extended, shortened and relocated at any time to reflect changing requirements.
- **Security:** storage bays can be individually locked in the closed position to ensure the security of confidential documentation. Double level security can be achieved by using lockable units within the bays i.e. Cupboards or Side Tambours.
- **Safety:** is a built in feature with a standard integral anti-tip device fitted on all bases supplied, along with a lockable handwheel.
- **Style:** Various styles of decorative end panels are available as an optional extra.
- **Choice:** all Silverline ranges can partner the tm:series.
